In 2003 Ronald L. Stuckey and I published a list of Ohio localities at which the type specimens of the names of vascular plants had been obtained, including the plant names based on specimens from each locality. Omissions have become apparent, hence this supplement. As in the original list, double asterisks denote names that are currently accepted for the respective taxa. Otherwise, the currently accepted names are given in brackets. Minor variants not otherwise accounted for are now generally not recognized taxonomically, but remain included within the same species. Further explanation of the format appears in our earlier paper.

OHIO

Carex xanthocarpa E.P.Bicknell, Bull. Torrey Bot. Club 23:22. 1896, not Degl. 1807; *C. vulpinoidea* var. *xanthocarpa* Kük., Pflanzenr. (Engler) 4(20, heft 38):148. 1909, based on *C. xanthocarpa* E.P.Bicknell; *C. bicknellii* E.G.Camus, Notul. Syst. (Paris) 1:239. 1910 and *C. brachyglossa* Mack., Bull. Torrey Bot. Friendship, Shawnee State Forest, Camp Gordon C.C.C. **Disporum schaffneri** Moldenke, *Phytologia* 1:167. 1935 [*Prosartes maculata* (Buckley) A. Gray].

In addition, the names *****Oxalis grandis*** Small, based on *O. recurva* Elliott sensu Trelease, not as originally applied by Elliott, and *****Sanicula trifoliata*** E.P.Bicknell were originally based on syntypes that included specimens respectively from "Ohio" and "Franklin County, Ohio." *Elymus canadensis* var. *intermedia* Vasey ex S.Watson & J.M.Coult. was originally described with no specimens cited but with the range said to include Ohio [now included in *E. virginicus* L. var. *virginicus*]. For all of these names later authors have designated specimens from other states as the lectotypes.
